Arizona Trail Water Reports

11/18/17

Water reports are compiled from personal experiences, hikers, e-mails, phone calls, and trail journals. Check regularly for updates.
Please send any current water reports to Fred Gaudet at fredgaudet1@gmail.com or call (480) 983-0112

Trail users are posting current water conditions on the Arizona Trail APP. These postings will be more recent than most Water Reports.

Mileage -- south to north -- agrees with Arizona Trail Segment Passages and GPS data at www.aztrail.org.

Information in this report is provided as a service to the community. Information in this report may not be accurate. **Natural water sources in Arizona can and do rapidly change. Resupply box may be empty.** The user of this information is solely responsible for their own safety. Hike your own hike.

Man made water sources are listed as TOWN or other facility. Some locations may be closed and no water available. The LOCATION will indicate if a water source is off trail with a note, such as 0.5m E

Abbreviations: **m** - mile; **N** - north; **E** -east; **S** - south; **W** - west. "~" means "approximately"

Water Codes: w0-not reliable or none; w1-seasonal or "iffy"; w2-probable; w3-fairly reliable; w4-very reliable source

It is recommended that water sources be verified with local sources, such as Forest Service Ranger Stations, National Park Service, BLM offices, or AZA Trail Stewards. Water quality may vary greatly and it is recommend that water sources be treated to reduce risk of water borne diseases.
